

Hydrocolloids training from CyberColloids

We offer a range of online training options to suit those who are working with hydrocolloids or want to learn more about hydrocolloids at every level

Our online training modules typically cover the topics listed below and are focused on food use but we can tailor them to suit your particular needs:

- Sources and supply chain
- Chemistry & key properties
- Production - different extraction approaches
- Products, grades & manufacturers
- Markets & end use

We currently have modules that cover the following:

- General introduction to hydrocolloids
- Agar
- Alginate
- Carrageenan
- Gellan
- The seed gums (LBG, Guar, Tara, Cassia)
- Konjac
- Xanthan

Training is delivered by 1 or 2 of the most appropriate members of the CyberColloids team. Sessions typically last ca. 1-2 hours depending on the level of interaction/ number of questions but times can be adjusted to suit your schedule.
